

**CENTURION UNIVERSITY OF TECHNOLOGY AND MANAGEMENT, ODISHA**

***Note on transformation from manual method to automation of examination system.***

The Examination & Quality Assurance cell (E&QA) has been continuously carrying out reforms in its examination procedure through integration of IT in the procedures and processes of the examination system. Tools of information technology are utilized for most of the activities associated with the conduct of examinations, evaluation and declaration of results. Examination procedure has been completely automated using ERP & EMS system.

There has been an evolution in technology from time to time to automate the examination system to have less human intervention and a technology driven system. This significantly minimizes human errors and facilitates accurate calculations of SGPA, CGPA and grades of students.

Examination system in CUTM has gone through different phases of transformation during its journey from 2011 to till date. A brief account of the same is given as under:

**2011-2013**

During the initial stage i.e. in 2011-2013, University used a standalone system where the examination processes were carried out centrally starting from subject registration to result publication. However, the internal marks were consolidated at the campus level in an excel mark format and sent to E&QA for further processing of results.

**2013 onwards**

In the year 2013, both EMS & ERP system was introduced to streamline the examination and academic tasks. In this phase some of the examination process were decentralised and delegated to campus examination cells. The different processes carried out through ERP at the campus level are:

- Subject Registration
- Examination Registration based on University Regulation
- Exam Schedule Import
- Admit Card generation
- Signature Sheet & Sitting plan
- Exam Attendance & MP Record
- Assignment Upload
- Internal Mark Capture
- Result Publication
- Semester wise Transcript at student login

EMS is used centrally for the following activities:

- Maintaining Syllabus / Subject repository
- Capturing student details – subject registration, examination registration etc.
- Receiving & masking of answer-books, generation of mark foils
- Processing of results – double mark entry, receipt of internal mark, defining grade set and processing result
- Maintaining and updating result records on real time
- Generation of academic transcripts

The EMS system is accommodative to the reforms in procedures, processes adopted by the University from time to time with regard to internal and end semester evaluation.
