About the session

The Internet of Things (IoT) is expected to emerge as a huge business opportunity for the Indian IT industry in the years ahead. According to a Gartner Report, the global IoT industry would be worth USD 300 billion by 2020, with connected devices increasing to 2.7 billion by that year. India, it is projected, will have a 5-6 percent share of this industry.

The expansion of IoT in the country is expected to be spurred by several developments:

- The proliferation of sensors, which will work with an ever growing number of intelligent systems and applications.
- The Indian Government's plan of developing 100 smart cities in the country, for which Rs. 7,060 crore has been allocated in the current budget.
- The launch of the Digital India Program of the Government, which aims at 'transforming India into a digitally empowered society and knowledge economy.
- The Indian IT industry has an opportunity to provide software applications, services and analytics related to IoT over the next few years

The workshop was conducted planning to conduct this workshop at free of cost for the current students to help them in building prototypes in Internet of Things. This one-day workshop creates awareness on IoT & Its Applications in following domains

- Smart Health
- Smart Transportation
- Smart Agriculture'
- Smart Buildings
- Smart Cities

- Smart Security
- Smart Retail
