School of Paramedics & Allied Health Science, BBSR

Workshop on Radiology Technician

Date: 12-11-2019 to 13-11-2019

Venue: Radiology, SPAHS, Madhusudan Block

Number of Participants: 74

Resource person: Mr. Abhinay Mohapatra and S. Satyabrata

About the session:

Session was about Radiology, a branch of medicine that uses imaging technology to diagnose and treat disease. Radiology may be divided into two different areas, diagnostic radiology and interventional radiology. Diagnostic radiologists use a variety of imaging procedures to see inside the body and assess or diagnose the patient's condition. Your radiologist plays an important role in your health by acting as an expert consultant to your referring physician (the doctor who sent you for testing) by providing assistance in choosing the proper exam and directing radiology technologists (those who operate the equipment) in properly performing quality exams.

Objectives:

- diagnostic imaging examinations e.g.; X-rays, CT etc.
- Diagnose the cause of your symptoms
- Monitor how well your body is responding to a treatment you are receiving for your disease or condition
- Screen for different illnesses, such as breast cancer, colon cancer, or heart disease

Outcomes: Implementation of a multifaceted PFP initiative using well-defined radiology patient outcome measures correlated with measurable improvements in radiologist behavior regarding key quality and safety parameters.
