Workshop on Cloud Technology

Topic	:	Cloud Technology
Date	:	15-11-2019 to 16-11-2019
Number of participants	:	60
Resource Person	:	Mr. RajKumar Mohanta
		Assistant Professor

About resource person:

Currently working as an Assistant Professor in the Computer Science & Engineering department of Centurion University of Technology and Management, Odisha having more than 11 years of teaching experience with a specialization in Cloud Computing, Currently he is pursuing PhD in Engineering. He had successfully completed certifications like AWS Cloud Practitioner, AWS Solutions Architect-Associate & AWS DevOps Engineer-Professional.

About this workshop:

The session started with addressing the problems in the cloud computing, Despite this growth, cloud computing, and cloud-computing research, has largely been stuck in an archaic computational paradigm: the renting of whole servers (virtual or physical), each with an allocation of CPU, RAM, storage, and network connectivity. With this model comes a host of issues that cloud providers and cloud users have attempted to paper over, with mixed success: inefficient allocation of computing and network resources, budget overruns, unresponsive elastic scaling in response to varied demands, difficulty securing whole-server/whole-OS platforms, and clumsy and low-level programming environments. Recognizing the above challenges, cloud providers have recently begun to offer "serverless" cloud computing, in which cloud users only need specify the application code to be run in response to some event; the cloud provider handles the rest (scaling, provisioning, security, resource allocation, etc.

Objective:
- To build and host static web sites in Cloud
- To Design and Deploy Serverless application

Outcome:
- Understand the concepts, characteristics, delivery models and benefits of cloud computing
- Understand the key security and compliance challenges of cloud computing
