**Topic** : Vermicompost Producer  
**Date** : 15-11-2019 to 16-11-2019  
**Number of participants** : 57  
**Resource Person** : Dr. Arunabha Pal

### **About Resource person:**

Dr. Arunabha Pal has a PhD in Agriculture and works as an Associate Professor at Centurion University of Technology and Management, Odisha, India. His areas of research are soil fertility, soil and water conservation and soil chemistry.

About the workshop: The workshop starts with highlighting the importance of soil quality for getting a better crop. The process of natural composting and its benefits. Vermicomposting is the scientific method of making compost, by using earthworms. They are commonly found living in soil, feeding on biomass and excreting it in a digested form. Vermiculture means “worm-farming”. Earthworms feed on the organic waste materials and give out excreta in the form of “vermicasts” that are rich in nitrates and minerals such as phosphorus, magnesium, calcium and potassium. These are used as fertilizers and enhance soil quality.

**Objective:** To understand the basic or foundation of vermiculture and vermicomposting.

**Outcome:** Participants acquire knowledge and skills in the establishment and knowledge of vermicast.
