Topic : **Hydroponics Technician**
Date : **15-11-2019 to 16-11-2019**
Number of participants : **100**
Resource Person : **Dr. Dinkar J. Gaikwad**

About resource person: Dr. Dinkar J. Gaikwad is an Assistant Professor at M.S. Swaminathan School of Agriculture, Centurion University of Technology and Management Odisha, India. He has completed Ph.D. in Plant Physiology from BCKV (West Bengal). He has participated in a number of National seminars, National and International Workshops and training programmes. Presently he is working on different hydroponics techniques for growing exotic vegetables.

About the session: This session starts with understanding about Hydroponic gardening. It is space-efficient and takes less water than gardening in soil. The benefits of hydroponics gardening, care and maintenance during the culture period. How to select the plants for culture. Supplements required for the practice, source of lightning. Growing in water also means no weeds. With artificial lighting, you can grow hydroponically all year long. Although almost anything can be grown hydroponically. Short-season crops or crops that do not produce fruit such as herbs and leafy greens are great choices for indoor production in the winter. In the summer, strawberries, tomatoes, cucumbers and peppers are all great choices. It's becoming more common for commercial growers of these crops to grow hydroponically instead of in soil.

Objective

- Responsible for successful cultivation of crops using hydroponics technique.
- Familiarity with Basic farming practices; and some experience in crop farming.

Outcome

- He/She can establish a Hydroponics set up.
- He/She will be able to run a Hydroponics setup for crop cultivation.
