About resource person: Mr. Sarlas Bhuyan works as a Professional Photographer at Centurion University of Technology and Management, Odisha India. He studied computer operator and programming assistant.

About the session:

Camera operator, or depending on the context **cameraman** or **camerawoman**, is a professional operator of a film camera or video camera as part of a film crew. The session discussed Important camera operator skills including choreographing and framing shots, knowledge of and the ability to select appropriate camera lenses, and other equipment (dollies, camera cranes, etc.) to portray dramatic scenes. The principles of dramatic storytelling and film editing fundamentals are important skills as well. The camera operator is required to communicate clearly and concisely on sets where time and film budget constraints are ever present.

Objective

- Shoot videos
- manage cameras
- light equipment
- Basic idea on images and photography.

Resource Person

Mr. Sarlas Bhuyan, Professional Photographer at Centurion University of Technology and Management. He is highly Skilled, artistically creative and dedicated videographer and editor.

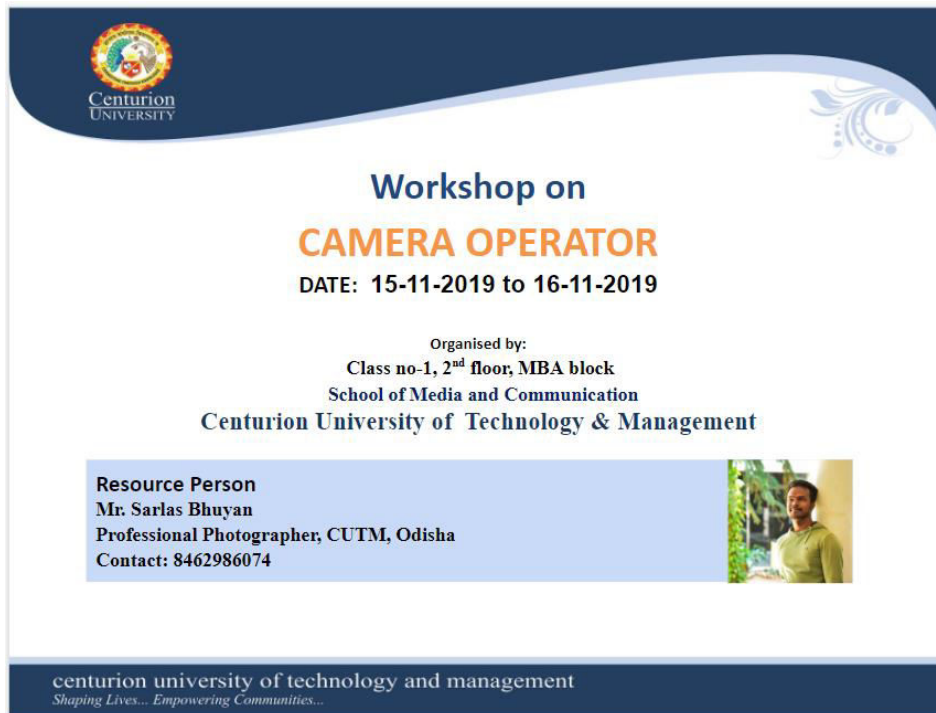

Outcome

Camera operators on multi-camera studio programmes, or outside broadcasts, are one of several cameramen and women who work as a team, all covering the action from several different

angles. Some have cameras mounted on mobile pedestals, which they move smoothly around the studio, rotate and adjust to create beautiful flowing shots. Multi-camera operators are often given ‘blocking’ or ‘shot’ notes, indicating where the presenters and contributors are going to move, these are then used for rehearsal and amended if necessary. During rehearsal, recording or live transmission, they all respond to instructions from the director via headsets
