Webinar Abstract and Report

Due to the popularity and user friendliness of the Internet, numbers of users of online social networks (OSNs) and social media have grown significantly. However, globally utilized, social networks are the consequence of the lack of understanding of secrecy and protection on OSN and media has increased. Secrecy and surety of OSNs need to be inquired from various perspectives. According to recent studies, OSN users expose their private information such as email address, phone number, etc. In this webinar, I will discuss a high-level classification of recent OSN attacks for recognizing the problem and analyzing the blow of such attacks on World Wide Web. Furthermore, I will provide the different insights related to Kali Linux for various information security tasks, such as Penetration Testing, Security Research, Computer Forensics and Reverse Engineering.

Outcomes:

Participants came to understand that, OSN have become vital part of the vast internet penetrated world. The instance shift has enabled social networks to enlarge with users on daily basis. The increased rate of social media usage has solicited the need to make its users aware of the pitfalls, threats, attacks and privacy issues in them. So, by analyzing all the threats and various attacks on OSN, possible solutions have been discussed through the webinar.
