**REPORT**

**Objectives**

To advance economic development, improve energy security, improve access to energy and mitigate climate change.

**Derailed Report**

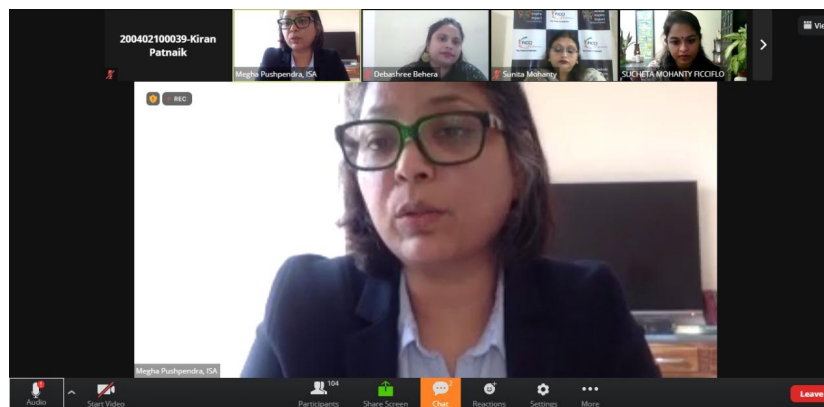

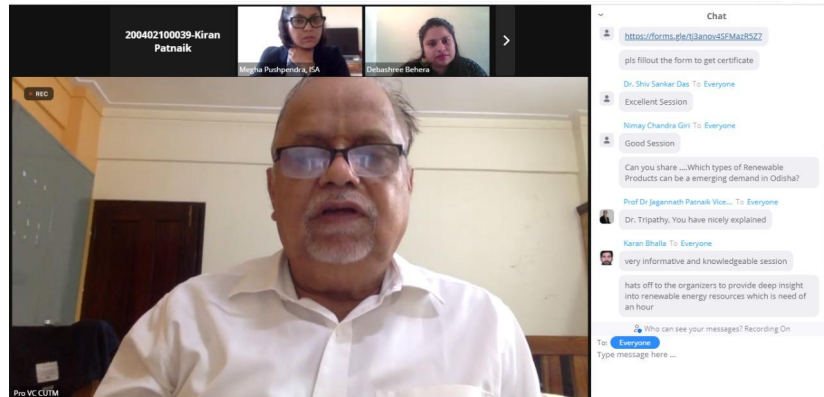

The Center for Innovators and Entrepreneurs with the School of Management and FICCI Flo organized a Renewable (Solar) Energy Scope for Future Entrepreneurs. The webinar was mentored by Dr. Upendra Tripathy, Emeritus Director General, International Solar Alliance and Dr. A. M. Mohanty, Pro Vice Chancellor, Centurion University of Technology & Management. The talk was mostly about the solar energy which could be used by future entrepreneurs. As it is the faster, cleaner and more economical route to universal access to power. The idea behind such enterprises is to create a business model that will help millions in India to leapfrog the coal- dependent grid straight to renewable energy sources.

As the third largest emitter of greenhouses gases and its economic progress intertwined with the energy sector, increasing renewable energy is vital to India’s sustainable growth. Simultaneously, lighting us homes of over 300 million people living in total blackout is important as well. So, webinar gave the students a deeper insight about the renewable (solar) energy.

E. Cell members and two management students, Pragyan Parimita Parija and Sunanda Priyadarshini coordinated the event.

### **Outcome**

Participants learnt how Renewable energy provides reliable power supplies and fuel diversification which enhance the security, low risk of fuel spills, and reduce the need for imported fuels. And also gain knowledge about different sources and renewable energy and benefits of it.
