His commitment to providing complete guidance to students and the youth looking for college & career counseling makes him one of the most sought-after career counselors in Madhya Pradesh.

About the Programme

Career counseling is a type of advice-giving and support provided by career counselors to their clients, to help the clients manage their journey through life, learning and work changes (career). This includes career exploration, making career choices, managing career changes, lifelong career development and dealing with other career-related issues. There is no agreed definition of career counseling worldwide, mainly due to conceptual, cultural and linguistic differences. However, the terminology of 'career counseling' typically denotes a professional intervention which is conducted either one-on-one or in a small group. Career counseling is related to other types of counseling (e.g. marriage or clinical counseling). What unites all types of professional counseling is the role of practitioners, who combine giving advice on their topic of expertise with counseling techniques that support clients in making complex decisions and facing difficult situations.

Objective:

The main aim of career counseling is to help students and professionals choose a field that is in tune with their skills and their job expectations. Thus, with professional help, most candidates end up choosing the right career and perform their level best, which ultimately helps them succeed

Outcomes:

The goal of Career Counseling is to not only help you make the decisions you need to make now, but to give you the knowledge and skills you need to make future career and life decisions.
