What is Data Science?

Data Science is about identifying those variables and metrics that **might** be better predictors of performance

Descriptive Questions (What happened?)	Predictive Analytics (What is likely to happen?)	Prescriptive Decisions (What should we do?)
<ul style="list-style-type: none">• What were revenues and profits last year?• How much fertilizer did I use last planting season?• How much downtime did I have last month due to equipment maintenance?• How many workers did I use last month?	<ul style="list-style-type: none">• What will revenues & profits likely be next year...?• How much fertilizer will I likely need next planting season...?• When will my equipment likely need maintenance next month...?• How many workers will I likely need next month and when will I need them...?	<ul style="list-style-type: none">• Plant X and Y crops across N acres• Pre-order X amount of fertilizer at 5% discount• Service your harvester and tractor #2 in January• Hire X number of workers for Y days
