A Report on Life Skills Development I 1st July 2017

As a student or even as a professional, we are bound to come across aptitude, reasoning tests at some point. These tests basically determine the best career path for the students depending on their skills and interests. They include many areas of assessment such as Verbal Reasoning, Numerical Reasoning, Abstract Reasoning and other such abilities. These tests have become really common these days, especially for students who are confused and undecided about their careers. Life Skill Development sessions were conducted in focus groups all the students of the university on 1st July 2017 and the number of students enrolled were 110.

Orientation by Dr. Girish Prasad Rath, Trainer, 1st July 2017 (Group-I)

The Focus of the Life Skill Development at CUTM:

1. Perfect Choice When Students are Unsure of their Future

Aptitude tests are perfect for students or even professionals who aren't sure or confused about their future or present career choices. These generate ideas and options for student's career after analyzing the skills and interests and determine a job that is best suited. Sometimes, these tests also generate job ideas that they hadn't even considered before.

2. Better Knowledge of their Strengths and Weaknesses

Aptitude tests give students a better understanding of themselves. They are designed to reveal students strengths and weaknesses and give a better understanding of their personality. This is important for professional development. It may also highlight student's hidden talents.

3. Educational and Career Advice

Once students have a better understanding of their strengths and weaknesses, it becomes easy for them to find out what career or job is best suited for them. This helps the students to know where they stand in the job market and also provide a platform to develop their skills with a variety of job opportunities.

4. Difference between Interest and Aptitude

Many students regret choosing a career based on their interest. It is important to know that there is a difference between interest and aptitude. Just because they are interested in a particular field does not necessarily mean that they have the required aptitude or potential for the same. Hence, it is important to select a career that incorporates both their interest as well as their aptitude so that they can achieve success and grow.

5. Increase the chances of Success

Once students are aware of their interest and potential, they can easily make an informed decision. They can acquire the necessary skills for their job and develop them by appropriate training. This will, in turn, increase their chances of success at the chosen career or job.

6. Decision making ability

The students can take their own decisions in challenging work environments and also develop the ability to take their own decisions when the situation necessitates to do so.

Future Prediction

Once students have figured out the best-suited career, developed the skills, it becomes easy to predict the potential for success. Such students are bound to be successful in future and aptitude tests are a perfect way to determine this whether it is promotion or admission to a new job.
