

Participate in international collaboration on gathering or measuring data for the SDGs

Centurion University leads SDG 17 efforts by fostering international collaborations to generate and measure data for global sustainable development. In 2024, CUTM advanced to the 601–800 band in the Times Higher Education University Impact Rankings (from 801–1000) and ranked 18th among Indian institutions. This progress underscores its commitment to high-impact partnerships with Curtin University, Western Sydney University, and SBM Bank, alongside participation in forums like the Global Sustainable Development Congress 2024.

Key initiatives include co-hosting the GSN International Conference on Responsible Professional Development for SDGs and partnering with the Australian Consul General on sustainability-focused skill training. By integrating academic rigor with global expertise, CUTM advances SDG monitoring and policy frameworks, exemplifying how universities can drive inclusive, data-driven progress. This report spotlights CUTM's pivotal global role in promoting equitable, sustainable futures through strategic alliances and knowledge sharing.

Participating With Global for SDG Monitoring Initiatives

Centurion University Participate in Global Sustainable Development Congress 2024

Centurion University Shines in University Impact Rankings and Participates in Global Sustainable Development Congress 2024

Centurion University participated in the Global Sustainable Development Congress 2024, strengthening its role in international collaboration on data gathering and measurement for the Sustainable Development Goals (SDGs). Through this global platform, Centurion University engaged with universities and research institutions worldwide to exchange methodologies for monitoring and evaluating SDG progress. The University shared data-driven insights from its projects in sustainable agriculture, climate resilience, and skill-based education while adopting global best practices for SDG data collection and reporting. This

collaboration enhanced Centurion University's capacity for evidence-based sustainability research and positioned it as an active contributor to the global SDG data and knowledge network.

- ❖ **In Collaboration with Curtin University, The GSN International Conference was held on Jan 2024, for creating Responsible Professionals for Advancing SDGs.**

Centurion University (CUTM), in collaboration with Curtin University, Australia, under the Global South Nexus (GSN) initiative, participated in the GSN International Conference on “Creating Responsible Professionals for Advancing the SDGs” in January 2024.

The conference focused on data-driven approaches to SDG implementation and the exchange of methodologies for gathering and monitoring SDG-related data. Centurion University showcased its community-based data collection and field survey practices, highlighting how local data informs research and policy on sustainable development.

- ❖ **Western Sydney University**

Centurion University of Technology and Management has established an international collaboration with

Western Sydney University (WSU), Australia, through a Memorandum of Understanding (MoU) to jointly advance the Sustainable Development Goals (SDGs) 2030. This partnership focuses on collaborative research, data gathering, and analysis in key areas such as social entrepreneurship, healthcare, and paramedical education.
