

## Energy Audit and Review Process

### Energy Audit at Different Campuses of Centurion University

Centurion University had conducted a comprehensive Energy Audit across its campuses in 2021 (valid upto 3 years) as part of its commitment to improving energy efficiency and promoting sustainable operations. The audit involved a systematic evaluation of energy consumption patterns in academic buildings, laboratories, hostels, and administrative facilities. It identified key areas for energy optimization, including lighting systems, HVAC units, and equipment usage. Based on the findings, the university implemented measures such as LED retrofitting, installation of energy-efficient appliances, solar integration, and load management strategies.
