COVID- 19 Vaccination Drive at Centurion University

Centurion University has been on a mission mode to vaccinate students, staff, and casual workers and community members since April 2021 but accelerated the inoculation drive since August 2021. After the 1st wave of COVID-19 in India, the University reopened its doors for its staff members and students, subsequent to the orders issued by the State Government in September this year. All COVID prevention protocols are duly adhered by the University and to optimise COVID protection across Campuses, Centurion initiated the Vaccination Drive in a phased manner. CUTM aims to cover as many people as possible with COVID inoculation (1st & 2nd dose) to boost the immunity of the people working within its Campuses, with a credo to ensure a safer and healthier working environment.

To ensure that all the stake holders are benefitted, the University has implemented Cluster Vaccination Approach, across its Campuses and piloted it in four clusters at its Campuses at Bhubaneswar, Paralakhemundi, Bolangir, and Rayagada. For the timely administration of the second shots, the University also facilitates periodical Vaccination Drives for local communities around these campuses.

In Bhubaneswar Campus, a five phases of vaccination drive has been adopted. The schedule for vaccination was intimated to all through emails and omnibus announcements. The vaccination drive was organized in collaboration with the Government Community Hospital, Jatni (Bhubaneswar).
